GRIDSTORE TO PREVIEW NETWORK ATTACHED STORAGE GRID TECHNOLOGY DURING MSPWORLD LAS VEGAS

Emerging Storage Innovator Combines Benefits of NAS and Enterprise Storage

Las Vegas– MSPWorld – November 12, 2009 – Gridstore, the innovation leader in enterprise-class Network Attached Storage grid (NASg)[™] solutions, today announced that it will be offering a technology preview of its Gridstore NASg offering during MSPWorld Las Vegas, November 12 and 13, in booth #4, at The Venetian. The new Gridstore NASg technology combines the simplicity, convenience and affordability of NAS with the scalability, performance and reliability of enterprise storage.

The Gridstore next-generation storage management solution consolidates distributed NAS islands into a powerful, enterprise-class storage grid. As a result, NASg is an ideal solution for Managed Service Providers (MSP), small and medium sized businesses (SMB), and distributed enterprises because it eliminates storage sprawl and combines the ease of NAS with the scalability and performance of proprietary storage.

“For today’s MSP, eliminating the risk, cost and complexity of storage has become a top priority,” said Kelly Murphy, CEO and co-founder, Gridstore. “Our innovative new approach to enterprise storage leverages all of the benefits of NAS at an enterprise scale so that MSPs can utilize their existing assets while simplifying storage management and increasing profitability.”

Editorial Opportunities

Company executives will be available for technology previews of Gridstore NASg throughout the MSPWorld conference. To schedule an appointment to speak with Gridstore, please contact Sabrina Sanchez at Ventana Public Relations, sabrina.sanchez@ventanapr.com

About Gridstore

Gridstore, Inc. is an innovation leader in enterprise-class Network Attached Storage grid (NASg) solutions.
